
Blacklist Redirect Not Working

Posted by bracey - 2008/02/12 06:14

The clicks from sites I've blacklisted and set to redirect are not redirecting.

Will look into issue. Looks like it doesn't work if you set to redirect from blacklist panel. If you blacklist from trade edit page - all should work.

That does not seem to work either.
Clicks still go to galleries and trades.

Right now I see that redirect may not work if you add domain to blacklist with redirect without having this domain as trade (maybe in past). Temporary solution - add blacklisted site as your trade and delete it.

Shared blacklist is on.
I added trade then delete like you suggested but that did not work either.
