## Cron job command

Posted by fusionx - 2008/06/09 00:06

---

Hello,

I blew past the cron job command during install. Can someone post it here for me?

Thanks!

```
*/2 * * * * cd /path/to/your/site/ftt/secure/; /path/to/php cron.php >/dev/null
```

/path/to/php can be /usr/local/bin/php or /usr/bin/php  
type whereis php in shell to know exact path.
