

## Download

Current version: {rdaddphp file=phpfiles/ftt\_version.php}

Minimum requirements:

PHP 4.2.0 and higher running as webserver module or in FASTCGI mode

PHP Safe Mode is OFF

mysql php extension

mysql server 3.23 and higher

Highly recommended configuration:

PHP 4.3.x and higher

running as webserver module or in FASTCGI mode

PHP Safe Mode is OFF

mysql php extension

zlib php extension

posix php extension

mysql server 4.0.x and higher (for maximum speed)

IMPORTANT! It is highly recommended to

have mysql 4.0.x or higher (4.1.x recommended) installed. Script will work on MySQL 3.23.x but on high traffic site it may become unstable and slow because of some limitations and bugs in MySQL 3.23. Support for MySQL 3.23 users also will be limited!

Zend Optimizer or IonCube NOT needed! All you need is php. You can use php cache software like eaccelerator or xcache if your other scripts doesn't require zend or ioncube.

You can get information about your PHP installation by running "php -i" from shell and about your mysql version by running "mysql -V" from shell

Download FAST TRAFFIC TRADER: ZIP or TAR.GZ archive
